

4-sided applicator frame

Applicator for the preparation of uniform films of coating materials, adhesives and similar products on plane substrates for testing purposes.

Features

- The 4-sided applicator frame has the great advantage that the coating material filled in cannot get below the guide surfaces. So there is no risk that the result will be falsified.
- Easy to handle
- Easy to clean

Handling

Place the applicator with the desired gap height on the substrate to be coated

Pour the product to be tested into the frame and apply with uniform speed (about 25 mm/sec)

Afterwards clean the applicator with a solvent

Standard extent of delivery

- 1 applicator
- 1 certificate of manufacturer
- 1 carrying case
- Options
- Automatic film applicator coater
- Precision-vacuumpates
- Test charts
- Calibration and certification (incl. certificate)

Technical specifications

Version	Gap height in μm	film width in mm
ZAF 2010.6030	30/60/90/120	60
