

Rolling ball tack tester

Fast and economical, the Rolling Ball Tack tester provides an easy method of testing the tack of an adhesive. It quantifies the ability of an adhesive to quickly adhere to another surface. The Rolling Ball Tack tester meets the standards set by the Pressure Sensitive Tape Council (PSTC-6) for tack testing a pressure sensitive adhesive.

- » Solid aluminum construction, made to withstand many years of laboratory use
- » CNC machined inclined trough, engineered for a smooth and accurate test
- » Extra care taken in the design to minimize a "bounce" at the ball-to-tape interface
- » Simple loading

Options

- » Various size balls available
- » Various material balls available
- » PSTC and TLMI testing manuals and videos

Specifications

- » Height: 2.5" (6.5 cm)
- » Width: 9" (23 cm)
- » Depth: 2.5" (6.5 cm)
- » Weight: 1 lbs (0.5 Kg)

Methods

Some of the more popular test methods that this device is capable of performing:

- » PSTC: 6
- » ASTM: D 3121

Tape Specimen Cutter:
A double razor blade sample cutter cuts samples to a precise 2 inch width. Other sizes available.
