

ROTAWASH COLORFASTNESS TESTER

Colorfastness to washing is easy and affordable with the Rotawash. Available in an 8 or 12 washpot model, this instrument can handle either the 550 ml or 1200 ml washpots. Washpots just press into place. The instrument is all stainless steel to provide years of reliable service in a wet environment. The touchscreen controller is preloaded with the most popular tests and provides information on when the test will be completed.

- Two sizes available – 8 or 12 washpot capacity
- All stainless steel
- Handles 550 ml and 1200 ml washpots
- Touch screen controller with standard tests
- preloaded
- Able to program and save custom tests
- Count down timer tells operator when test will be finished
- Selectable languages English, Chinese, Spanish, and Turkish
- Door safety switch stops rotor if opened
- Rotor jog button eases loading and unloading
